

3.2 INTERPRETATION OF ZONING DISTRICT BOUNDARIES - The following rules shall be used to interpret the exact location of the zoning district boundaries shown on the Official Zoning Map:

3.21 - Where a zoning district boundary approximately follows a street, alley or railroad, the center line of the street or railroad right-of-way is the boundary of the district.

3.22 - Where a zoning district boundary approximately follows a property line or a series of property lines, such line or lines is the boundary of the district.

3.23 - Where a zoning district boundary approximately follows a stream or the shore line of a body of water, that stream or shore line at pool, as defined on the date this Regulation is enacted, is the boundary of the district.

3.24 - Where a zoning district boundary does not clearly follow any of the features mentioned above, its exact location on the ground shall be determined by measurement according to the Official Map scale.

3.25 - In any case, where the exact location of a boundary is not clear, the Board of Adjustments shall use these rules to determine the exact location upon application by the Building Inspector for an original interpretation.
